PROFESSIONAL EXPERIENCE

Web Designer / Analyst | CodeNest | Remote Apr 2020 - Present

- Design and develop responsive websites and digital experiences using HTML, CSS, JavaScript, C#, SQL, WordPress, Shopify, and Liquid.
- Translate business goals into page structure, visual direction, user flows, branded interfaces, and production-ready web solutions.
- Manage hosting, domains, deployments, integrations, troubleshooting, SEO improvements, content updates, and ongoing client support.

Machine Learning Specialist | Outlier | Remote Oct 2024 - Present

- Review AI-generated code and technical content for correctness, logic, clarity, and quality.
- Identify software issues and improve technical responses through structured evaluation and problem-solving.

Operations Manager | LA Fitness Dec 2024 - Sep 2025

- Managed daily operations, staff coordination, scheduling, customer experience, and issue resolution in a fast-paced environment.
- Led team workflows and communicated across staff and customers, strengthening project ownership and stakeholder-management skills.

IT Support / Software Technician | Niagara College Jan 2024 - Apr 2025

- Provided software troubleshooting, technical support, documentation, and application assistance.
- Applied programming and debugging skills to diagnose technical issues and support reliable technology use.

SELECTED PROJECTS

- FitHub / Gym Management Platform - designed and developed a management interface for members, schedules, classes, trainers, and operational workflows.
- NIA CRM - built a business-management application using .NET, C#, Entity Framework Core, and database-driven CRUD workflows.
- ONE80 Revolution - developed and refined a Shopify e-commerce experience including product pages, mobile UX, checkout-related configuration, redirects, and post-launch updates.
- Student Transportation Website Demo - created an accessible public-service website concept with responsive UI and modern application architecture.
